CQG connects traders to Montréal Exchange

Montréal, Quebec, January 31, 2006 – CQG, Inc. continues to expand its order routing coverage for traders.

The Denver-based market data provider now allows traders to execute orders on the Montréal Exchange (Bourse de Montréal). Traders can place orders using any one of a full range of products, including CQG Integrated Client, CQGTrader and WebTrader.

CQG's order execution gateway uses the FIX protocol to connect to the Montréal Exchange's SAM electronic trading engine. Six futures commission merchants are currently slated to use CQG to connect their customers to Montréal.

Montréal is the latest exchange on an impressive list available for order routing with CQG. CQG customers already have access to e-CBOT, CME Globex, the CME floor, Euronext, Eurex, EurexUS, and NYMEX Access & Floor. The company will continue to add order routing connectivity to more exchanges in 2006, including Singapore, ICE, the Sydney Futures Exchange and the CBOT floor.

About CQG

CQG is the world's leading vendor of quality market data, analytics, and electronic trading. Its data coverage includes futures, options, fixed income, foreign exchange, and equities exchanges worldwide, as well as debt securities, reports and indices. Founded in 1980, CQG has development offices in Denver and Moscow. Its sales and support offices are in Chicago, Frankfurt, Glenwood Springs, London, Moscow, New York, Paris and Tokyo.

For more information about CQG, please call 1-800-525-7082 or visit www.cqg.com.

About Montréal Exchange

The Montréal Exchange (MX), Canada's oldest exchange, was established under charter in 1874 after more than 40 years of informal trading. In 1965 it moved to its current location in the Exchange Tower in Victoria Square. The exchange is a true competitor on the US options market thanks to the quality of its services and its technology infrastructure.
